Janes H. Piren, Acting Commissioner of the General Land Office.

The lands in the DIXON district, embraced in the above proclamation of the President of the United States, were explored by Mr. Owen, the geologist of the State of Indiana, under instructions for the House of Representatives, passed 6th Feb uary, 1839. The able report of this gentleman, published as document No. 2.9, House of Representatives, first are ion of 70th Congress, shows that these lands include all the productive mines, and the entire region in which, from observations during his survey, there is reason to believe that valuable veins of ore may readily be found. Further, that in 1839, the lead mines of Himois, lowa, and Wisconsin, though only partially worked, p educed upwa do of the ymillions pounds of lead-those of Himois, lowa, and wisconsin, though only partially worked, p oduced upwa do thit ymillions pounds per annum.

These lands boing situated on and near the Missisippi and Fever rivers, the cost of transporting the p oducts of them to St. Louis is only about fifteen cent- per hundred pounds. The soil is of excellent quality, and yields abundantly all the product to that latitude.

The lands in the SHAWNEE FOWN district have not been explored by an and the suppliered by his and products of lead and zinc, cost of the near of other wind of the suppliered by lead and zinc, cost of the near of other and river of the near of other The w lif of the n e gr of sec 21, t 14 n, r 2 w, in Hendricks county

one w, containing eighty acres, in Hendricks county; mortgaged by William C. Hyten. To a amount due, \$455 63.

The chalt of the se qr and the shall of the ne qr of sec twenty The lands in the mineral regions, embraced in the above proclar mation of the President of the United States, are believed to contain the richest mines of lead that have yet been discovered; the ore yielding about eighty per cent of pure metal. Copper, also, has been found in this region in considerable quantities.

Great advantages are said to exist for the manufacture of lead in various forms, particularly into abot, the river banks being so elevated as to require little or no expense in the erection of towers; and the ore, from its great purity, may be manufactured into shot by the first smelling.

The location of those mines being near the Mississippi river, affords as being unusually fertile, producing all the small grains in great abundance, and turnishing excellent range for cattle—thus presenting equal inducements to the agriculturist and the miner.

The DUBUQUE min s in fractional townships eighty-mine and ninety, of range two east, situated on the barks of the Mississip, are considered the most important; the DURAN. GO mines in township eighty-eight, of range two east, situated on the barks are the next in value; and the CA TTESE mines in fractional township eighty-eight, of range three east, also on the river, are the the next in value; and the CA TTESE mines in fractional township eighty-eight, of range three east, also on the river, are the functional productive as any now known.
